

Summer Glare Is Here! Time for the NEW 4X4™ Polarized Protective Eyewear

Gateway Safety's New Eyewear Reduces Glare and Provides Ultimate Impact Protection

April 2010—Manufactured by Gateway Safety®, the new **4X4™ Polarized** is an ideal eye protection solution for outdoor workers who face significant glare from bright sunlight. The dual lenses also eliminate eye-damaging ultraviolet radiation from the sun, blocking more than 99.9% of UV-A, UV-B and UV-C light.

Polarized lenses reduce or eliminate most glare from reflective surfaces, such as the hood of a vehicle, the surface of water or even a paved roadway. Reducing such glare helps minimize eye strain, which can lead to headaches, and improve vision clarity for the wearer.

4X4™ Polarized has a durable, yet lightweight wraparound frame with dual polycarbonate lenses, designed similar to modern-day sunglasses. Comfort features include a soft nosepiece for a snug fit and flexible temple tips to relieve pressure behind the ears. An anti-scratch coating helps maintain a clear view of the jobsite. These features - sleek sunglass styling, all-day comfort, and clearer vision - encourage daily compliance.

Gateway Safety's **4X4™ Polarized** is the newest distinctive option in the complete **4X4™** line of safety eyewear, which also includes the standard **4X4™** version, **4X4™ Sport**, and **4X4™ Style**. All 4x4 products meet or exceed the ANSI Z87.1+ and CSA Z94.3 standards.

About Gateway Safety

Gateway Safety, Inc. designs and manufactures award-winning, cost-effective personal protection equipment. Product categories include eye, face, head, hearing, and respiratory protection. For more than 65 years, it's been Gateway Safety's mission to help employers increase safety compliance and improve the overall welfare of their employees by making safety products that workers want to wear—which, in turn, helps companies reduce the high costs associated with workplace injuries.
